Business and Industrial Engineer, twice valedictorian of his promotion, CFA Level I, with three years of project experience gained alongside two full-time Master's degrees, across public infrastructure, institutional strategy, healthcare research and equity analysis. Now seeking a role in strategy, finance, business operations & development, in a fast-paced and demanding environment.

EXPERIENCE

CILE · Liège water utility, 560,000+ residents served <i>Strategy & Operations Engineer</i>	Liège, Belgium Sep 2025 – Jun 2026
– Built the make-or-buy case and target operating model for internalising road-opening works (equipment, two depots, staffing, procedures and governance), covering 480 interventions a year across 24 municipalities. – Designed and built two browser applications that unified the 24 municipal permit procedures into one workflow: preparation time fell from 98 to 11 minutes, for a projected €597K of value over ten years at zero infrastructure cost.	
AIASHI · University of Liège <i>AI Project Lead</i>	Liège, Belgium Sep 2024 – Jun 2025
– Led an AI platform structuring 100,000+ documents into decision-ready intelligence for a €200M+ annual research environment, producing a three-level taxonomy of 1,977 topics from 62,000 abstracts. – Defined the validation framework, governance logic and deployment roadmap: usable coverage reached 89.8% and quality-control accuracy 96%, bridging technical delivery with university leadership priorities.	
Long COVID Research Network <i>AI Engineer & Researcher</i>	Belgium / France Apr 2025 – Feb 2026
– Led the AI workstream with clinician-researchers to standardise fragmented paediatric evidence, mapping 148 clinical observations into 128 standardised medical terms; findings were presented at an international conference in Boston and submitted to Belgium's Superior Health Council.	
HEC Liège · Faculty of Medicine & Executive Education <i>Teaching Assistant & Invited Lecturer, Strategy, Finance & AI</i>	Liège, Belgium Sep 2023 – Jun 2026
– Supervised 300+ students across strategy, finance, operations and digital-transformation projects for corporate and healthcare partners, turning ambiguous executive questions into decision-ready recommendations. – Invited by HEC Liège Executive Education to deliver applied-AI sessions to executive audiences, grounded in business cases I had led.	
CFA Institute Research Challenge <i>Equity Research Analyst</i>	Liège / Amsterdam Sep 2024 – Jun 2025
– Built and defended a full initiating-coverage thesis on Just Eat Takeaway.com (SELL rating, 18.5% downside) before investment professionals at Euronext Amsterdam; ranked 2nd of 20 Benelux universities.	

EDUCATION & CREDENTIALS

HELMo Gramme · MSc Industrial Engineering, 18.2/20	Jun 2026
